

Spend Less
.....
Get More

Real ROI

“During iPhone releases, TrinDocs helps us automate 30,000 invoices a month.”

- Teresa Dye, Assistant Controller, Cellular Sales

Here are a couple of examples of how TrinDocs delivers results almost immediately:

- After implementing TrinDocs, ProLift Industrial Equipment cut the time it takes to process an invoice by 50% and saved \$125,000 during the first year with automation!
- Virginia Tire & Auto, a full-service auto repair company with multiple locations, saved over \$50,000 in courier fees alone!

TrinDocs

What is TrinDocs?

TrinDocs is a document management and workflow solution that automates the routing, storage and retrieval of documents and transactions for any organization. TrinDocs integrates seamlessly with virtually any business software and can provide immediate return on investment (ROI) by improving efficiency and reducing costs.

This solution provides the features and scalability found in Fortune 100 companies at a more reasonable price point. Why would you spend more for the same thing? Why don't you get more from your current solution?

TrinDocs is different because it has been designed from the ground up to automate and streamline processes. Scanning, storing and retrieving is not enough today. Specifically, the vision behind our solution is to help companies handle inbound transactions such as inbound e-mail attachments. With TrinDocs, these transactions are automatically processed.

InboundAutomation

InboundAutomation™ is our unique phrase to describe the essence of what TrinDocs does better than anyone else. InboundAutomation is the process of automating the receipt, data read, routing and entry of inbound electronic content. All business software solutions today enable an organization to send electronic transaction content (invoices, receipts, work orders, timesheets and more). However, there are no solutions designed to enable an organization to RECEIVE such content! TrinDocs enables organizations to automate the receipt and processing of those transactions.

When you receive electronic content (such as a vendor e-mailing a PDF invoice), what steps do you take today to process it? Do you print it? Do you key it? Do you need to review or match it? Do your locations need to see it? Does it need approval?

TrinDocs enables ALL of those steps to be completely automated! Our solution will even monitor a designated mailbox for you to watch for these transactions coming in! It will automatically receive them, verify them, apply business rules, route them for approval and, when finished, it will automatically put the information into your business software! We can virtually eliminate the need for data entry and manual routing. And, the final document is automatically stored in a secure, electronic format that is instantly retrievable from your software, a browser or even our mobile app (Yes, we have a mobile app to search, retrieve and approve documents!).

TrinDocs for Dynamics

- TrinDocs has 20 plus years' experience with Dynamics technology. We are the national experts in NAV and GP integration among document management providers.
- TrinDocs can be designed to meet your business needs from matching purchase order receipt lines to auto coding on invoices that do not have a PO. Ask us how we can customize TrinDocs to meet your company's needs.
- We were built from the ground up specifically for Dynamics NAV and GP.
