Make on-time payments the norm
Quickly process ACH and credit card payments within your ERP or CRM on behalf of customers, or give them convenient self-service payment options.

Automate time-consuming manual tasks
Free up your team to be productive instead of manually tracking payments, resending invoices or applying payments.

Make informed business decisions
Improve reporting with reliable, up-to-date payment data all in one place — no matter how or when you get paid.

Recoup processing costs and reduce risks
Qualify for lower interchange fees with Level 2 and 3 processing and easily implement a surcharge program that's card brand compliant.

Take payments 24/7 with a convenient customer portal

- Allow customers to pay the way they prefer, including credit/debit cards, ACH, eCheck or digital wallets like Google Pay™, Apple Pay® and PayPal

- Process payments on behalf of customers, schedule automatic payments and invite users to sign up for the portal

- Give customers any time access to view outstanding invoices and invoice history, or download invoice details as a PDF

- Notify customers when payment was approved, new invoices are available or to remind them of outstanding invoices
