

VERSAPAY

Transform accounts receivable— directly in Microsoft Dynamics 365 Business Central

Drive efficiencies, accelerate cash flow, and improve customer experiences with Versapay's powerful suite of AR automation solutions. Versapay, formerly known as ChargeLogic, has the experience and expertise your customers can count on.

Automate or eliminate almost all routine AR tasks

Invoicing

Payment
processing

Invoice matching
and reconciliation

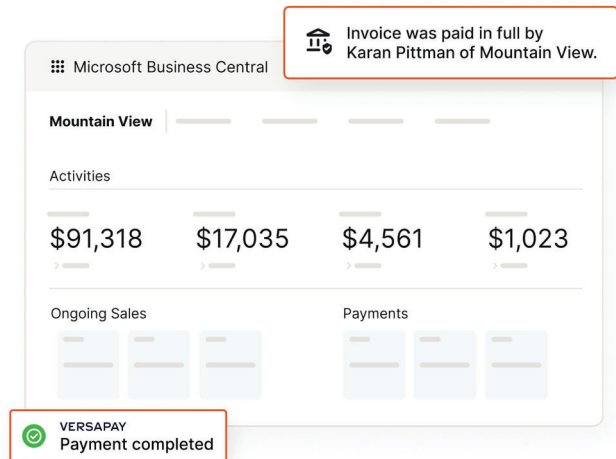

Payment and ERP
system syncing

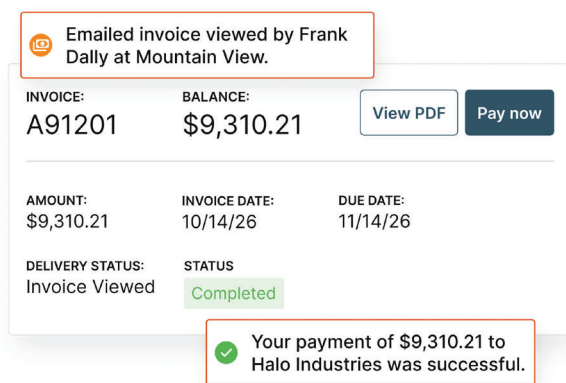

Powerful solutions for every AR need

ERP Payments

- Accept payments across sales channels directly in Microsoft Business Central
- Streamline invoicing and make it part of your native workflows
- Accept credit cards and ACH payments, and minimize fees with Interchange Optimization and Level II and III processing¹
- Protect yourself and your customers by tokenizing and safely storing sensitive credit card data in compliance with PCI DSS

¹Minimum transaction volume and data levels required to qualify for Level II and Level III processing.

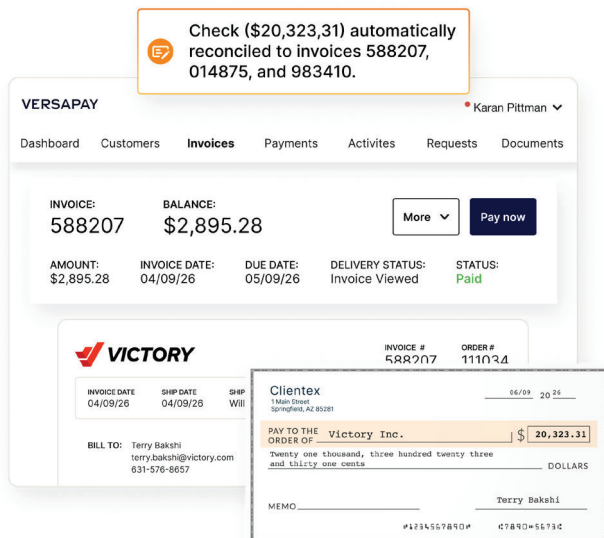

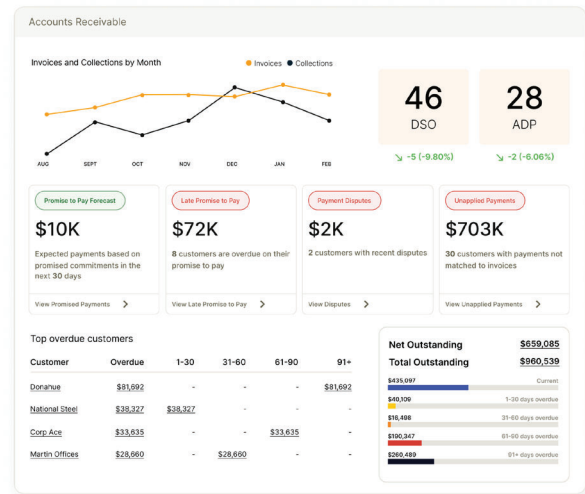

Customer Portal

- Customers can make payments easily using stored methods and set up AutoPay for timely transactions.
- 24/7 access to account details, balances, and payment history through the portal
- Payment methods can be updated anytime, and notifications can be set for key account events
- Disputes and short pays are managed with built-in tools for faster resolution

We close the gap between AR teams and customers

Collaborative AR

- Automate invoice delivery and reminders to accelerate payments and reduce overdue accounts
- Provide a self-service portal for customers to view, pay, and manage invoices
- Enable real-time collaboration through messaging, document sharing, and dispute resolution
- Integrate with major ERPs and ensures secure, PCI-compliant transactions

Cash Application

- Automate payment matching using AI and OCR to reconcile ACH, wire, check, and digital payments with invoices.
- Extract remittance data from emails, PDFs, portals, and lockboxes to eliminate manual entry
- Resolve efficiently with built-in workflows for short-pays, deductions, and unmatched payments
- Integrate with ERPs and banking systems to streamline reconciliation, reduce costs, and improve cash flow visibility

Why Microsoft Dynamics 365 Business Central clients love Versapay

aden + anais™

rpc
SCIENCE & ENGINEERING

“As the leading Dynamics integration software for payment processing, Versapay creates a smaller margin for error because everything is available in one, centralized location. **It minimizes time and processing and became extremely helpful for all our users.** Credit card payments and refunds are handled with ease directly inside Microsoft Dynamics.”

Riyad Deen

Vice President of Global Technology, Aden + Anais

“Using the software makes my job **so much easier.** It frees me up so I can learn more about the strategic part of management accounting.”
