15%  
improvement  
in fill rate

## AI-powered planning for visibility, speed and accuracy

### Inventory Optimization

- Increased visibility with a prioritized dashboard
- Automatically classifies inventory
- Efficiently replenish stock while reducing operating costs
- Build custom reports tailored to your business
- AI tools that deliver real results with just one click

### Demand Planning

- Forecast top-down, bottom-up, or middle-out
- Flexible planning, role-based units of measure
- Analyze by product, channel, customer, or group
- Combine external data + insights for accuracy
- Track performance to improve reliability
- Boosts team collaboration

### Inventory Forecasting

- Automatically assign the best demand forecasting models for each item, customer, region, unit, price, cost, or margin
- Generate reliable sales forecasts, factoring in seasonality and trends
- Measure the impact of future stock projections on your inventory

### Inventory Ordering

- Auto-generation of purchase orders, transfers, and production orders
- Prioritize business-critical orders
- Forward ordering and container optimization
- Redistribute inventory between multiple warehouses

### Supplier Performance

- Measure suppliers' performance
- Monitor and improve lead times
- Dynamically adjust safety stock as conditions change

### Sales & operations planning

- Bring teams together on one platform to align goals.
- Synchronize sales forecasts, inventory, procurement, operations, and finance.
- Plan in currencies or quantities, fully aligned across teams.

# Smarter planning starts with Netstock's AI Pack

## Netstock's AI makes planning simple.

With a single click, see exactly where inventory is at risk, spot excess stock, and focus on the actions that drive results. Turn complex dashboards into clear, actionable summaries

- Optimize stock levels through tailored, item-level insights
- Resolve inventory issues independently with practical solutions
- Easily understand reports with simplified explanations
- Instantly analyze and understand current safety stock coverage
- Automatically generate emails to send to suppliers to address common issues
